PROJECTS

Blood Bank Management System [Go to Project](#)

A simple system for managing blood bank donations, inventory, and requests. It includes features for user registration, donation tracking, and request management.

Kanban [Go to Project](#)

It helps users organize tasks in a board with To Do, In Progress, and Done columns. Users can add, edit, and move tasks to track progress, enhancing productivity.

Code Editor [Go to Project](#)

CodeEditor is an online coding platform built with Node.js and MongoDB, allowing users to write, run, and save code in the browser with a smooth, real-time experience.

Weather App [Go to Project](#)

A weather forecasting app that provides real-time weather data for any city, integrated with an external API to fetch current weather details, temperature, and forecasts.

Expense Tracker [Go to Project](#)

An application to track personal expenses and categorize them. Users can add, edit, and delete transactions, helping them stay on top of their budgeting.

LANGUAGES

English (Professional) | Nepali (Native) | Hindi (Proficient)
